Patria Plus contains three modules: **Treasury Plus**, **Economy Plus** and **Share Plus**.

The core of the product is its information and news section. Online data is available from stock, currency, bond, money and commodity markets. Complemented by commentaries from direct market participants, this data takes on a whole new dimension. We also analyse the data and, using models and expert assessments, provide development forecasts. Extensive databanks of historic data round off the product. Patria Plus also includes consultation services – company analysts answer your questions about stock markets and the Czech economy.

 <p>Treasury Plus</p>	<p>Treasury Plus – spot and forward rates for international and Central European currencies in real time, money market rates, interest swaps, FRA rates and commodity prices. The analysis section contains analyses of monetary policy and the development of the crown exchange rate, prognoses, commentaries and databanks. The module also includes extensive SMS and e-mail services.</p> <p style="text-align: right;">For financial professionals</p>
