### About EP Infrastructure (“EPIF”)

The EPIF Group is a leading European energy infrastructure utility primarily focused on regulated and/or long-term contracted activities. The EPIF Group owns and operates strategically important energy infrastructure assets structured into four business segments – Gas transmission, Gas storage, Gas and power distribution and Heat infra.

- Gas transmission: eustream acts as the sole gas transmission system operator in the Slovak Republic. Eustream’s pipeline is a part of the most essential corridor for piped gas supplies to the Central European and Southern European regions irrespective of the gas source and flow pattern.
- Gas storage: The EPIF Group operates, through its subsidiaries, the largest gas storage capacities in Central Europe in Slovakia and Germany that have a strategic role in ensuring energy security.
- Gas and power distribution: SPPD is a leader and natural monopoly of the gas distribution market in the Slovak Republic, while SSD is the second largest power distributor in the Slovak Republic and natural monopoly in its respective region of operations.
- Heat infra: The EPIF Group is a major Czech district heating operator in the Czech Republic and an important provider of the grid balancing services to the Czech power transmission system operator.
